WHO IT IS FOR · WHAT IT IS

Finding out what a procedure requires shouldn’t mean knowing someone

For Cambodian citizens

who need the steps, documents, fees and office for a government service: a driving licence, a birth certificate, a vehicle, a trademark, a bank complaint.

Today that information is scattered across ministry sites, Facebook and Telegram, often as undated images in Khmer, so people lose a day or pay a broker.

What is new about SuperAsk

Source first. It answers only from approved ministry content, and every answer carries its source and review date.

Declines instead of guessing. A general chatbot invents a fee; SuperAsk refuses when no source supports the answer.

Khmer and English. Ask in either language; the reply follows yours.

One engine, three doors. Web chat, Telegram bot and Telegram Mini App.

Five use cases, four business goals

USE CASE · OWNER	BUSINESS GOAL	WHAT YOU WILL SEE
UC-1 Ask · UC-2 Retrieve Chun Phallamonunhh	Bilingual access Comprehensive information	“How do I renew my driving licence?” in English, then in Khmer: the answer quotes the ministry page in the language asked. Follow-up: “How much does it cost?”
UC-3 View citation Choi Heejae	Trustworthy answers	The source card: ministry, Prakas No. 047, effective and last-verified dates, review status, link to the official page.
UC-4 Decline Sarin Sereyprophea	Trustworthy answers	“What is the weather in Phnom Penh tomorrow?” It declines and says what it does cover, instead of guessing.
UC-7 Office contact Heng Bunkheang	Ministry contact and location	In Telegram: “Where do I apply for a driving licence?” Service centres, hotline 1275, email, office hours.
UC-11 Refresh content Neang Doungkhe	Comprehensive, current information	The monitor checks moc.gov.kh page by page. Changes go to a reviewer, never straight into answers.

PLAN FOR THE REST OF THE SEMESTER

From working prototype to Demo 2

NOV 10 – 16

Apply Demo 1 feedback

Sharper relevance check, so a question on an uncovered topic is declined instead of matched to a nearby one.

Report 3 Part 1 · Nov 16

NOV 17 – 23

More services, better ranking

Add approved content for passports and business registration; put the right source first more often than today's 67.6%.

Full Report 3 · Nov 23

NOV 24 – DEC 3

Finish the remaining use cases

An office directory with map links for UC-7, follow-up memory in Telegram, real user accounts, a reviewer portal for monitored changes.

Demo 2 · Dec 4

Thank you. Questions?
